## **The Tornado™ Revolutionizes the Computer File Transfer Industry with Patented Auto-Load Function and First True Plug-and-Go Convenience**

### **Data Drive Thru's New Pocket-Sized Tornado is Quickly Becoming a Must Have Tool for All New Computer Purchases and IT System Information File Transfers**

**Dallas, Texas – October 2, 2006 --** Data Drive Thru, Inc.™ has created a secure and reliable way to transfer files and other personal documents between two computers that forever eliminates the need for software installations, additional cables and professional technical assistance. The Tornado's patented auto-load/auto run technology immediately initiates a peer-to-peer network connection between computers by simply plugging The Tornado™ into a USB port on each machine. The actual installation of the drivers and software needed to move the data bi-directionally from one computer to another is accomplished within a few seconds without touching the keyboard or mouse.

The Tornado™ features two retractable USB cables and embedded software that auto-loads and auto-runs a user-friendly split-screen onto each computer. The screen displays the contents of each computer and allows for a simple drag and drop action to move files from one machine to another at speeds up to 25 Mb/sec. The Tornado™ also can be used to quickly create back-up files and is compatible with most Microsoft® operating system programs.

"The number one problem faced by millions of replacement computer purchasers is the challenge of moving files and personal information off their old computer and onto a new one," said Paul L. Andrus, Founder and CEO of Data Drive Thru. "The Tornado™ solves that problem with its unique patented technology and ease of use. We have received rave-reviews from several test market programs where people from all walks-of-life have successfully used The Tornado™ with no problems or technology hassles."

"The Tornado™ has been used by IT professionals and PC owners to transfer all types of files and personal documents in the medical, insurance, banking, investment, accounting, legal, entertainment, energy and traditional business industries," said Clint Hughes, Vice President of Marketing for Data Drive Thru. "Everyone who has used The Tornado™ has been excited over its performance. It is quickly becoming a must have tool with any new computer purchase."

The Tornado lists for \$59.95 and can be purchased from [www.thetornado.com](http://www.thetornado.com).

#### **About Data Drive Thru, Inc.**

Data Drive Thru™ is the innovator of intelligent computer cable products that solve the problem of data transfer between two personal computers/laptops (PCs). Its unique patented technologies automate the process of getting data from one PC to another. With its global headquarters located in Dallas, Texas, the company is comprised of dedicated entrepreneurs and executives who are passionate about revolutionizing the way data is moved from one personal computer to another and easing the frustration that we all experience when we buy a new PC.
